ZORRO

Requirements

To play Zorro you must have:

- ✓ 33 mhz 386 or faster machine
- ✓ 2048k EMS RAM
(See page 12 on Memory if help is needed)
- ✓ 4mb of RAM
- ✓ A CD-ROM drive
- ✓ MS-DOS 5.0 or higher
- ✓ A VGA or better monitor
- X Joystick recommended but not required
- X Supports AdLib, Adlib Gold, Aria Sound Cards, ATI Stereo FX, Covox Speech Thing, Gravis Ultrasound, IBM Speaker, Microsoft Sound Systems, Pro Audio Spectrum 8 & 16, Sound Blaster/Compatibles, Sound Blaster 16 & Pro, Tandy EX/TS/STL, Turtle Beach Multisound, Walt Disney Sound Source.

ZORRO

Installing Zorro

1. Turn the computer on.
2. Put the Zorro-CD into the CD ROM drive and type the letter of that drive, followed by a colon. For example: Type D: and press .
3. Type the word, INSTALL and press .
4. Make sure that the Zorro-CD is left in the CD ROM drive.

Note: Type SETUP to change the sound selection after the initial installation. Once a sound card is selected, the game will automatically configure your computer.

ZORRO

Before You Start Playing

Before you start playing, you must have enough memory available. If you have DOS 5.0 or higher, make sure that a memory manager program is running. Please do not try to run this program under Windows, through the DOS icon or while using any type of disk compression program.

After installation, follow these steps to start the game:

1. Change to *Zorro* directory at the C: prompt by typing:

CD\ZORRO and press .

2. Type in **ZORRO** and press  to start the game.

ZORRO

Introduction

Legend has it that centuries ago a large gold mine was rumored to be near La Refugio Sagrado Mission, California. But, no one knew exactly where it was located. Then, one day, a well dressed man by the name of Don Francisco Cortez shows up at the small missionary bringing hope and promise. Senor Cortez found a map to the long lost gold mines. The gold once found, will be given to the missionary, where it belongs. Don Francisco Cortez promised all of the villagers and the missionary that if they helped him find the gold, the missionary would flourish.

Once the gold was found, Cortez fled. The priests, worried, sent a man to look for Cortez, he never returned. The village is out their share of the gold. By this time next month they will be without corn and grain. Starvation will soon follow. The town which was once dreaming of riches and fame, now sits in despair, wondering how they will survive the winter. Their hopes are down until the masked man shows up in town . . .
Zorro.

ZORRO

Game Play

Zorro's adventure is divided into five parts. As you progress through the game you will slowly uncover Don Cortez's ultimate goals. But your travels will be difficult as you visit the following locations on you search for Senor Cortez:

Gold Mine

Desert

Iron works

Spanish Fort

Hacienda/Forest

During the game play you will be presented with video footage to help you through the game. If you wish to skip these, and start the game immediately, press **[ESC]**.

ZORRO

Movement

The following instructions show you how to control Zorro with the use of the keyboard. If you wish to use the joystick, read the "Joystick" section instead.

- To make Zorro Walk press the appropriate key.
- Zorro can Run by holding down the desired keys.
- To take a Small Step press the key one time.
- Zorro can Jump Up by pressing the one time.
- To make Zorro Climb Down from a ledge or plank, press .
- Zorro can Crouch Down to avoid obstacles flying at him by holding down the . Make sure you are not near a ledge or you will climb down to the lower level.
- To make Zorro Leap from a standstill press .
- Zorro can make a Leaping Jump Just press while running.

Note: If Zorro is not aligned properly to jump up, try pressing the twice from a standstill. This will move him forward just enough to grab something on the second try.

ZORRO

Swordplay

In order for Zorro to attack or defend himself, he must have a sword in his hand. However he cannot accomplish all of his tasks with his sword out.

- To pull out and use the Whip press **CTRL**.
- To Unsheath Zorro's sword press **ALT**.
- To Sheath Zorro's sword press **↓**.
- To Attack with the sword press the **ALT**.
- To Defend or Block an opponent's attack, press **↑**.
- To Turn Around with the sword press **ENTER**.

Zorro may jump down with the sword out by pressing **↓**. But he will not have it ready when he lands.

Options and Special Keys

- F1** Onscreen Help Menu
- F2** Save the current game
- F3** Load a saved game
- S** Turn sound On/Off
- K** Select Keyboard controls
- J** Select Joystick control and Recalibrate Joystick
- FESC** Quit game to DOS or avoid Story Telling Sequence
- M** Change Music
- V** Turn Music and Sound On/Off

ZORRO

Joystick Play

The following commands are for joystick users. Remember that Zorro cannot run or jump while his sword is out.

In order to block or parry an opponent's attack, you must defend just as your opponent is striking.

In order to leap across large pits, you must time your jump perfectly with the edge of the pit or Zorro will plummet.

* Your sword must be unsheathed in order for the sword commands to work.

ZORRO

Trouble Shooting

The following is a list of solutions to minor problems that might occur when trying to run *Zorro*:

Problem: I've typed in *Zorro* and the game will not run or start.

Solution: You may not have enough free conventional memory. Run the **CHKDSK** command in DOS and make sure the 'BYTES FREE' is at least 590,000. If it is not, make a floppy boot disk and try again (refer to your DOS manual for this procedure).

OR Make sure the CD in your CD ROM drive when playing the game.

Problem: Game locks, freezes or dots appear at the top of the screen.

Solution: Free conventional memory needs to be 590k.
Extended (XMS) needs to be 2048k and
Expanded memory (EMS) needs to be 128k.

ZORRO

CREATING A CD ROM BOOT DISK

- ① Insert a blank high density disk in your A: drive. From the DOS C: prompt, type: **FORMAT A:/S**
- ② When the Dos Prompt returns and the format is complete, type:
COPY AUTOEXEC.BAT A:
COPY CONFIG.SYS A:
- ③ Now you must *Edit* the two files on the Boot Disk by typing:
EDIT A:\AUTOEXEC.BAT
 - *Delete* the line containing **SMARTDRV.EXE**
 - *Delete* any lines that run programs that will not be used for this Boot Disk.
- ④ Exit and save this file by typing: then then
- ⑤ Now *Edit* the CONFIG.SYS file by typing:
EDIT A:\CONFIG.SYS

Make sure the FILES and BUFFERS lines both equal 40.
FILES=40
BUFFERS=40
- ⑥ **Remove** any lines that are made for programs that will not be used for this Boot Disk.
- ⑦ Exit and save this file by typing: then then
- ⑧ Now leave the disk in the machine and **RESTART** your computer.

ZORRO

MEMORY MANAGER

Most up-to-date machines have 4MB of RAM already installed but not in use. To ensure your computer is running properly follow these directions.

REMEMBER that hard drive space and total system memory available have no bearing on free RAM.

- ① Put your computer to the DOS directory by typing: `C:\DOS`
- ② Type in the the following to run your Memory Manager:
MEMMAKER
- ③ Choose **Express Setup** when prompted.
- ④ Press ☒ when asked if you have any programs that use extended memory.
- ⑤ The computer will now reconfigure your machine to use the extended and expanded memory. This process should take from 2 to 5 minutes to complete. When the DOS prompt appears, you may now start the program.

ZORRO

FOR FURTHER SUPPORT

This product has been tested and is proven to work on many different computers. If the program will not start, make sure you have tried our two quick solutions before calling our Tech Support number. If your problem is with game play or bugs, please write them down, so we know what exactly, the problem is.
